Hardy Herbaceous Perennials

ALPINE PLANTS

Graduate Horticulturist and Landscape Gardener

LONG DISTANCE TELEPHONE

NOTES.

All offers are made subject to stock being unsold.

Five and fifty at ten and hundred rate respectively, and where price per 1,000 is given, 250 will be furnished at this rate.

A charge for packing will be made, sufficient to remunerate for the cost of material and labor.

All plants listed are at least one year old and grown in the open field.

Considering where my nursery is located, on the southeast slope of the Blue Hills, the bleakest, most exposed, and according to the U. S. weather bureau, windiest section east of the Rocky Mountains, is it not reasonable to assume that any plant raised and grown here will succeed under conditions a little less trying?

Braintree is on the N. Y., N. H. & H. R. R., ten miles south of Boston, with more than 60 trains a day in either direction.
